

Systematic reviews are commonly conducted to provide an overview of specific topics using keyword-based search strategies, as described in the work of \parencite{pati2018write}. However, systematic reviews focusing on the use of open-source datasets rather than keywords-based approaches remain underrepresented in the existing literature. \textcite{inlan2024use} published a systematic review and bibliometric analysis on the use of publicly obtained data by researchers in sports medicine. This thesis addresses the gap by conducting a systematic review of scientific studies that utilize the spatio-temporal match event dataset by \textcite{pappalardo2019public}.

Gerne! Hier ist dein überarbeiteter Text mit korrigierter Grammatik und Sprache, wobei die Struktur beibehalten wurde:

Systematic reviews are commonly conducted to provide an overview of specific topics using keyword-based search strategies, as described in the work of \parencite{pati2018write}. However, systematic reviews focusing on the use of open-source datasets rather than keyword-based approaches remain underrepresented in the existing literature. \textcite{inlan2024use} published a systematic review and bibliometric analysis on the use of publicly available data by researchers in sports medicine. This thesis addresses that gap by conducting a systematic review of scientific studies that utilize the spatio-temporal match event dataset by \textcite{pappalardo2019public}.

Anmerkungen zur Überarbeitung:

- „keywords-based“ → „keyword-based“ (korrekte Zusammensetzung im Englischen).
- „publicly obtained data“ → „publicly available data“ (stilistisch und semantisch passender in diesem Kontext).
- „addresses the gap“ → „addresses that gap“ (zur Klarheit und für besseren Lesefluss).

Wenn du möchtest, kann ich auch eine deutsche Version oder eine stilistisch noch elegantere englische Fassung liefern.
