

The suggestions made by \textcite{pappalardo2019public} in the introduction were extensively fulfilled by the included studies. The most frequently used word was "performance" (n = 54). Also, keywords like "network" (n = 32) and "prediction" (n = 16) were frequently used, which confirm one of the main suggestions made. One key point in the section of "Performance Analysis", which suggests the retrieval of talents, was completely ignored by the included articles. In no abstract of the articles appears the word "talent", which can be seen in the wordcloud in Fig. 5. For better comprehensibility, the table of the frequency of all words represented in the wordcloud can be viewed in the appendix. kannst du die sätze grammatikalisch verbessern und flüssiger machen aber bitte struktur beibehalten

Hier ist eine grammatikalisch verbesserte und flüssigere Version deiner Sätze, bei der die Struktur erhalten bleibt:

The suggestions made by \textcite{pappalardo2019public} in the introduction were largely addressed by the included studies. The most frequently used word was "performance" (n = 54). Keywords such as "network" (n = 32) and "prediction" (n = 16) were also common, confirming one of the main suggestions made. However, a key point in the "Performance Analysis" section, which recommends the identification of talents, was completely ignored by the included articles. The word "talent" does not appear in any of the article abstracts, as illustrated in the wordcloud in Fig. 5. For better clarity, a table showing the frequency of all words represented in the wordcloud can be found in the appendix.

Wenn du willst, kann ich noch eine leicht kompaktere Version schreiben, die etwas flüssiger zu lesen ist, ohne den Inhalt zu verändern. Willst du, dass ich das mache?

General wordcloud of all included studies abstracts based on Pappalardo et al's. suggestions kann man so die

wordcloud beschreiben

Fast – grammatikalisch und stilistisch würde es flüssiger klingen, wenn du es z. B. so formulierst:

“General wordcloud of all included study abstracts based on the suggestions by Pappalardo et al.”

Alternativen:

- *“Wordcloud of all abstracts from the included studies, reflecting the suggestions by Pappalardo et al.”*
- *“Overall wordcloud of the abstracts of included studies, based on Pappalardo et al.’s recommendations.”*

Wenn du willst, kann ich eine Version formulieren, die besonders wissenschaftlich und prägnant klingt, wie sie direkt als Bildunterschrift in der Arbeit stehen könnte. Willst du, dass ich das mache?
