Gerne! Hier ist eine grammatikalisch und stilistisch überarbeitete Version des Satzes, bei der die Struktur erhalten bleibt:

"Additionally, the journals and conferences of the included articles were categorized using the online platform 'Scimago Journal and Country Rank (SJR)' to analyze their disciplinary distribution and frequency."

Alternative mit leicht gehobenerem Stil:

"Additionally, the journals and conferences of the included articles were categorized with the help of the online platform 'Scimago Journal and Country Rank (SJR)' in order to analyze their disciplinary distribution and frequency."

Beide Varianten sind korrekt – die erste ist direkter, die zweite etwas formeller.
