Another big limitation is that the classification of area of application and methodological approaches was based on subjective interpretation of the study content, without following a strictly systematic or standardized procedure. kannst du den satz sprachlich verbessern

Natürlich! Hier sind einige sprachlich verbesserte Versionen des Satzes auf Englisch, jeweils leicht unterschiedlich im Stil:

1. Klar und akademisch:

"Another major limitation is that the classification of application areas and methodological approaches was based on subjective interpretation of the study content, rather than a strictly systematic or standardized procedure."

2. Etwas formeller:

"A further significant limitation lies in the fact that the classification of application domains and methodological approaches relied on subjective interpretation, without adherence to a rigorous or standardized methodology."

3. Kompakter:

"Another key limitation is that the classification of research areas and methods was based on subjective judgment, without a systematic or standardized approach."
